

## Section One : Exercises

For the following exercises:

- ✓ if the script is provided, draw the results out
- ✓ if the script is not provided, write the script which will produced the requested results

1.

```
<html>
<head>
  <title> My First Web Page! </title>
</head>
<body>
  Web pages are fun!
</body>
</html>
```

2.

```
<html>
<head>
  <title> My Second Web Page! </title>
</head>
<body>
  Web pages are still fun!
</body>
</html>
```

3. Write out a script that would print your name on the screen. Then, type this into the computer and view it.

4. Write out a script that would print today's date on the screen. Then, type this into the computer and view it.

5.

```
<html>
<head>
  <title> Using the paragraph tag </title>
</head>
<body>
  <p> The paragraph tag tells the browser that the text is to be formatted like a
  paragraph which means that the browser will put in a blank line and then start to
  display the text, wrapping to new lines as needed.
</body>
</html>
```

6.  
<html>  
<head>  
    <title> Using the Break Tag</title>  
</head>  
<body>  
    I know how to use the break tag. <br>  
    <br>  
    Yes, I sure do...u-huh!  
</body>  
</html>

7. Write a script that displays Hello on one line. Then, using break tags, insert two blank lines and write "Beautiful day today, isn't it?".

8.  
<html>  
<head>  
    <title> Aligning Text </title>  
</head>  
<body>  
    <p align = "right"> So this is how you right align text! </p>  
</body>  
</html>

9. Write a script that centers the Shakespearean quote:  
"The fool thinks himself to be wise man, but the wise man knows himself to be a fool."

10.  
<html>  
<head>  
    <title> Bold Text </title>  
</head>  
<body>  
    <b> This text is in bold. </b>  
</body>  
</html>

11. Write a script of the same format as Exercise 10, but show the use of italics and underline instead.

12. Write a script showing how the horizontal rule can be used to separate text. (ie ~ type a sentence, insert a horizontal rule, type another sentence)

13. Write a script showing how the horizontal rule can be used to separate text. (ie ~ type a sentence, insert a horizontal rule, type another sentence). This time, set a width, an align, and a color for the horizontal rule.

14.

```
<html>
<head>
  <title> Links</title>
</head>
<body>
  <a href = "http://www.nwcsd.ca/~johnpaul"> John Paul II Website </a>
  <a href = "mailto:b.degenstein@nwcsd.ca"> Mrs. Degenstein's Email </a>
  <a href = "exone1.html"> My First Website </a>
</body>
</html>
```

15.

```
<html>
<head>
  <title> Headers </title>
</head>
<body>
  <h1> This is header one. </h1>
  <h2> This is header two. </h2>
  <h3> This is header three. </h3>
  <h4> This is header four. </h4>
  <h5> This is header five. </h5>
  <h6> This is header six. </h6>
</body>
</html>
```
